PACK OVERVIEW

The *Darkbringer Pack* is a Kickstarter Exclusive box that contains all the Kickstarter Exclusive Stretch Goals: Heroes, Mobs, Roaming Monsters, and Bosses to be used with *Massive Darkness 2: Hellscape* and *Heavenfall*. It also contains miniatures that can be used to replace some tokens.

Bosses: This pack contains 3 Bosses, each with their own Tiles, Boss dashboard, and Quests (pages 3-8).

Roaming Monsters: To include the 6 new Roaming Monsters in your games, simply shuffle their cards into their corresponding decks.

Mobs: To include the 2 new Mobs in your games, simply shuffle their cards into their corresponding decks.

Spirits and Constructs: These miniatures may be used to replace their respective tokens in your games. The Spirits are part of the Shaman Class while the Constructs are part of the Tinkerer Class.

Exo-Armor: Instead of using the Exo-Armor token next to the Tinkerer miniature, to represent that they have the Exo-Armor equipped, replace the token and Hero miniature with the Exo-Armor miniature.

Heroes: 8 of the new Heroes in this pack belong to Classes from ***Hellscape***, while 4 belong to Classes from expansions. To include them in your games, simply add them to the pool of available Heroes that can be chosen.

Heroes Using Components from Other Classes

Victor and Valdis use components from other Classes: Rogue tokens and Thieving Tools bag, and the Arrow cards, respectively. During setup, if there are no Heroes of the corresponding Classes in the game, setup those components as if there were.

- **Victor (Paladin):** If a hero that is not a Rogue gains a Rogue token, they may use it for 1 extra action on their turn. If the token matches the action, they receive the benefit. Unused Rogue Tokens are discarded at the end of the Hero's turn.
- **Valdis (Wizard):** At the end of Valdis' turn, all the discarded Arrow cards must be shuffled with the Arrow deck.

THE SCORPION KING

The Scorpion King has been corrupted beyond salvation by the Infernal Realm and has been set loose upon the world. It has become a mindless killing machine that's all-too-effective at its singular purpose. Fighting it in its own habitat is the only way to end its cruel reign that is starting to corrupt its surroundings.
